

**EFFECTIVE VIRTUAL AND GLOBAL TEAM MANAGEMENT**

**DURATION**

3 1/2 Days Lecture/Lab

**SUMMARY**

The Effective Virtual and Global Team Management training course prepares business application project managers to lead successful international and virtual projects. Special attention is given to managing teams that are comprised of multi-cultural technology teams. The student is introduced to the changes required in cost estimating, scheduling, and quality assurance for virtual team projects. This knowledge can remove some of the complexity and communication

**AUDIENCE**

This workshop is designed for the experienced project manager.

**TOPICS**

- Managing Virtual Teams
- Managing Cultural Diversity
- Managing International Business Application Projects

**PREREQUISITES**

Advanced techniques and concepts are addressed with special emphasis placed on software development issues. It is recommended that students have completed the Project Management - PMP Track, or equivalent project management training.
